

Dear Customer,

On October 26, Tektronix signed an agreement with Sypris Solutions for the acquisition of Sypris Test & Measurement (STM). We are very excited about the addition of STM to the Tektronix family. This is another positive step forward for our current and future customers.

STM is a leading provider of calibration services, testing and component sourcing services, and specialty products that include state-of-the-art magnetic measurement instruments, current sensors and hall generators. They serve customers in a wide variety of markets, including military, aerospace, avionics, telecommunications, automotive, semiconductor, medical, FDA-regulated and more. Major corporations and government agencies choose STM for their exceptional breadth of offerings, their national reach, and their unrelenting commitment to delivering the highest quality products and services in the marketplace.

With over 60 years of history, Tektronix maintains a long-standing leadership in the test and measurement industry. The addition of STM will only strengthen our ability to provide an expanded set of service offerings and geographical coverage. We are now able to provide support for more than 96,000 Tektronix and other T&M vendors' products.

STM, in partnership with Tektronix, will enable more local support for your service needs, including temporary on-site, permanent on-site, mobile, and depot based calibration and repair. Furthermore, STM will accelerate our offering of enhanced products and services to support your business needs and growth.

We encourage you to learn more about STM and share in our excitement by visiting www.tektronix.com/stm. We welcome interest in how we can expand our partnership with you through our expanded STM capabilities. Please feel free to contact us at svcsales@tektronix.com or 503-627-7143 with any questions or concerns.

Your business continues to be extremely important to us.
